General characteristics

Description: Blue vinyl gloves.
 Fine and sensitive to touch, because its external surface is smooth in fist, palm and fingers.
 Cuff rolled

Useful life : 5 years

Clasification:
 Medical Device **Class I**; *Regulation (EU) 2017/745*.
 PPE **Category III** *Regulation (EU) 2016/425*

Sizes: Small, Medium, Large, Extra Large
Colour: blue

Physical Properties

Composition : Polyvinyl Chloride (PVC)

Features:

- Ambidextrous
- Latex free
- Free of proteins
- Free of Tiuram, animal tissue or other biological substances

Uses and applications

Exploration gloves in the **health, medical or dental fields** use, complies with the regulations and standards of medical protective gloves (EN 455); its use is intended for the protection of the patient and the user against low **biological and chemical** risk, meets the requirements for the verification of microbiological safety and low chemical risk (EN 374). It is recommended for tasks of short duration and with a high frequency of change.

They are widely used in the **food industry, electronics and cleaning** because PVC does not contain latex or chemical accelerators, so that the problems of skin irritation due to allergic causes are reduced and, in addition, they offer acceptable comfort and elasticity. In the field of food, these gloves comply with the requirements of regulation 10/2011 regarding plastic materials intended to come into contact with food.

Storage conditions

Keep stored in a cool and dry place. Avoid excess heat and protect from direct sunlight or fluorescent lighting.
