**Uses and applications**

These gloves are suitable for **light industry**, especially **cleaning, construction, maintenance** and **electronic** tasks. They are a very good alternative as NBR does not contain latex or chemical accelerators, so they reduce skin irritation due to allergies and provide acceptable comfort and elasticity.

They are also used in the **food industry**, as they comply with Regulation 10/2011 on plastic materials intended to come into contact with food.

They provide protection against **microbiological** and **mechanical risks**.

### Storage Conditions

Store in a cool, dry, covered and well-ventilated area. Protect from direct sunlight or fluorescent lighting. After use, keep in the original packaging.
