

NITRILE GLOVE POWDERFREE BLUE

DATA SHEET

Presentation of the product

Packaging

• Content: 10 boxes of 100 units

• **Dimension:** 310 x 225 x 220 mm

Box of 100 units

Content: 100 units

• **Dimension:** : 210 x 110 x 60mm

Labelling

- Name and address of the manufacturing company
- Name of the product in several languages
- Commercial reference, batch and barcode
- AQL 1.5
- Expiration date
- EC Marking

- Size and number of units
- Single use
- Storage conditions
- Protection pictogram
- Legislation and Reference
- Uses, applications and warnings

General characteristics

Description: Blue Nitrile gloves powder free.

Fine and extra sensitive to touch because the area of the fingers is textured for a better grip both wet and dry. Reinforced rolled sleeve.

The surface of the glove is treated with chlorine, this prevents the gloves from sticking together.

Interior covered with synthetic material, this helps to make them easier to put on and take off.

The nitrile offers three times more protection against the micro-holes present in conventional latex gloves, for this reason, it is the best choice when choosing a latex-free glove.

Useful life: 5 years

Paseo de la Castellana nº 141. Plantas 18 y 19. 28046 Madrid

NITRILE GLOVE POWDERFREE BLUE

DATA SHEET

Clasification:

Medical Device Class I; Royal Decree 1591/2009, Regulation (EU) 2017/745.

PPE Category III. Regulation (EU) 2016/425

Sizes: Small, Medium, Large, Extra Large

Colour: Blue

Physical Properties

Composition: Acrylonitrile Butadiene Nitrile (NBR)

Features:

Ambidextrous

- Latex freePowder free
- AQL 1.5
- Textured fingers
- Free of proteins
- Free of Tiuram, animal tissue or other biological substances

Uses and applications

In the **sanitary** field, gloves for the realization of medical **examinations**, dentistry, clinical examination, diagnostic and therapeutic procedures, for laboratory uses and in general for all the activities that require a glove that acts as a protective barrier against infectious bodies, as in the field of research and veterinary medicine.

Only for a low risk exposure level.

Its protection against **chemical** risks is low. It meets the requirements for the verification of microbiological safety and low chemical risk (EN374).

They are also used in the **food**, **electronics and cleaning** industry because the NBR does not contain latex or chemical accelerators, so that skin irritation problems due to allergic causes are reduced and others offer acceptable comfort and elasticity. In the field of food, these gloves comply with the requirements of regulation 10/2011 regarding plastic materials intended to come into contact with food.

Storage conditions

Keep stored in a cool and dry place. Avoid excess heat and protect from direct sunlight or fluorescent lighting.
