

Presentation of the product

Packaging 500 units

- **Content:** 10 bags of 50 units
- **Dimensions:** 470 x 265 x 237 mm

Bag of 50 units

- **Content:** 50 units
- **Dimensions:** 265 x 230 x 50 mm

Bag of 50 units

- Name and address of the manufacturing company
- Name of the product in several languages
- Commercial reference and batch number
- Manufacturing and expiration dates
- Barcode (EAN) and UDI code
- Number of units
- Single use
- Storage conditions
- EC Marking
- Legislation and Reference
- Uses, applications, and warnings

General characteristics

Description

Shoe covers DELUXE in reinforced fabric with anti-slip polyethylene sole.

Textured surface, with elastic adjustment that allows a good adaptation to other protective elements. The material of construction, polyethylene, allows good resistance to liquid penetration and the rubber elastic makes it easy to put on and adjust. Waterproof.

- Length: 41 ± 2 cm
- Width: 16 ± 2 cm
- Weight: 9,0 ± 1g

Shelf life: 3 years

Clasification

- Class I Medical Device; Regulation (EU) 2017/745
- Category I PPE: Regulation (EU) 2016/425
- Suitable for contact with food

One size

Colors: White-Blue

Physical Properties

Composition and Features

Material used: Polyethylene (PE)

- Ambidextrous
- Non-Sterile
- Protein-Free
- Latex-Free
- Powder-Free
- Tiuram-Free

Uses and applications

In the sanitary field, protective shoe covers for work in clean medical-sanitary and food environments, for laboratory use and in general for all activities where a minimum protection against contamination of the environment is required, acting as a protective barrier against splashes.

They are also used in the food, electronics and cleaning industries because PE and PP do not contain latex or chemical accelerators, thus reducing skin irritation problems due to allergic causes, although they are not designed to be in direct contact with the skin, and they also offer acceptable comfort and ease of application. In the food area, these shoe covers comply with the requirements of regulation for plastic materials intended to come into contact with food, although they are not designed to come into direct contact with food except accidentally.

Directives and Reference Standards

- Regulation (UE) 2016/425 Personal Protective Equipment
- Regulation (UE) 2017/745: Regulation on Medical Devices
- Regulation (CE) N°1935/2004 of the European Parliament and of the Council on materials and articles intended to come into contact with food
- Regulation (UE) 2020/1245, amending and correcting Regulation (EU) No 10/2011 on plastic materials and articles intended to come into contact with food
- ISO 9001:2015: Quality management systems
- ISO 13485:2016: Quality management systems for medical devices
- ISO 14001:2015: Environmental management systems

Storage conditions

Store in a cool, dry place, between 10 and 40 °C. Avoid excessive heat and protect from direct sunlight or fluorescent lighting, as well as from proximity to high-frequency equipment.

Management system

Quality management system according to ISO 9001.

Product conformity
